PRODUCT CATALOG 2024/2025

Amii is a candle factory located in Estonia. We produce handmade scented candles and many other wellness products. Our products have high quality and luxurious appearance. Our team is full of enthusiasm and desire. We love what we do.

Amii products are handmade in small batches, using only the highest quality and environmentally friendly raw materials. Soy wax comes from a renewable natural resource - soybeans. Soy wax is environmentally friendly and fully degradable in nature. Stearin consists of animal fats and palm oil. Stearin is biodegradable. Essential oils are aromatic organic chemical compounds found naturally in nature, the benefits of which extend far beyond the mere sensation of aroma. Fragrance oils are phthalate free.

Amii products fill your rooms with wonderful aromas, creating a pleasantly cozy atmosphere.

We are representatives of WONDERCANDLE® and Haribo candles.

Thanks for the eco-friendly choices.

POWDER CANDLE NEW!

Unscented POWDER CANDLE made of vegetable wax.

Burning time 120 h
20 wicks
500 g powdered wax

The powder candle with a snowlike effect is endlessly customisable and allows you to express your creativity. Recycle empty candle jars or find inspiration and create your own unique candle story. If desired, add your favourite essential oils, candle fragrances, or candle colours to the powder candle. Feel joy in your creation and let the flame warm your soul, filling your surroundings with a nice cosy atmosphere.

Use:

- 1.** our a thick layer, 4 cm at minimum, of powdered wax into a non-flammable container. The diameter of the container must be at least 8 cm, so the powdered wax does not melt and stick to the container. The packaging of the powder candle is not suitable for burning the candle.
- 2.** Insert the wick into the powdered wax so that about 1 cm of the wick sticks out of the powdered wax. In a larger container, you can also use several wicks at once.
- 3.** Light the candle.

Use a candle extinguisher to extinguish the candle. When the wick runs out, renew the candle with a new wick. If desired, remove the hardened powdered wax from the container – this way, the candle will look like new again.

SCENT DIFFUSERS

Net wt 100 ml

An eye-catching and convenient way to perfume rooms. The base liquid of the Amii scent diffuser is made from renewable, soy-based sources.

Base: Remove the caps from the diffuser. Replace the bamboo cap and place a suitable number of sticks in the bottle. The aroma will be absorbed by the sticks and the rooms will be filled with a pleasant scent. You can adjust the intensity of aroma by adding or removing sticks. To reinvigorate the aroma, we recommend turning the sticks upside down in the bottle once a week. Please use gloves or household paper when turning the sticks. The aroma will persist for an average of three months.

- Dreams
- Honeysuckle & Sandalwood
- Lavender Breeze
- Twilight Garden
- Winter Morning

The selection includes white and black fiber sticks.

SCENT DIFFUSER REFILLS

Net wt 100 ml

The base liquid of the Amii scent diffuser is made from renewable, soy-based sources.

Base: Pour the scent diffuser refill into the empty scent diffuser. Replace the fiber sticks if needed (sold separately). The aroma will persist for an average of three months.

- Dreams
- Honeysuckle & Sandalwood
- Lavender Breeze
- Twilight Garden
- Winter Morning

FIBER STICKS (5 PCS)

Length 26 cm, diameter 4 mm.

Give your used scent diffuser a new look by replacing the old fiber sticks with new ones.

You can adjust the intensity of aroma by adding or removing sticks. To reinvigorate the aroma, we recommend turning the sticks upside down in the bottle once a week. Please use gloves or household paper when turning the sticks. The aroma will persist for an average of three months.

- Black fiber sticks
- White fiber sticks

AMII RE-BOARD DISPLAY

Both manufacturers and retailers need to keep their displays attractive and fresh at all times in order to achieve product movement and sales success. We have created a RE-BOARD display for Amii products to help display products in a representative and a beautiful way.

Re-board is foldable and lightweight - easy to transport, set up and store. Re-board can withstand a load of 70 kg per square meter and is B1 fire resistant. Also environmentally friendly, as it is produced from waste and is 100% recyclable when disposed of.
